DETAILED ACTION

The co-pending applications 10/763,070 and 10/762,592 filed on June 2, 2005 has been considered.

Election/Restrictions

1. Applicant's election of claims 1-8 of figures 3-5 in the reply filed on May 25, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Drawings

2. Figures 1-2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 1, "the active junctions" renders the claim indefinite. It is not clear where "the active junctions" comes from.

Claim 3, line 1, "the contacts" renders the claim indefinite. It is not clear where "the contacts" comes from.

Claim 3, line 3, "the entire region" renders the claim indefinite. It is not clear where "the entire region" comes from.

Claim 6, lines 1-3, "said at least one conductive finger solid", "the most external semiconductor layer" and "said most external semiconductor layer" render the claim indefinite. It is not clear where "said at least one conductive finger solid", "the most external semiconductor layer" and "said most external semiconductor layer" come from.

Claim 8, line 1, "The diode of claim 5" renders the claim indefinite. It is not clear where "The diode of claim 5" comes from.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2814

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3, 5 and 6, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Kobayashi [U.S. Pat. 3,925,803].

With respect to claims 1-2, Kobayashi (figs. 3 and 5, cols. 3-4) discloses a semiconductor component in which active junctions (j) extend along at least one cylinder perpendicular to main surfaces of a semiconductor chip substantially across an entire thickness thereof, said at least one cylinder having a cross-section with an undulated closed curve shape (Sierpinski curve type) (see fig. 3).

With respect to claim 3, Kobayashi further discloses conductive fingers perpendicular to the main surfaces of the semiconductor chip and substantially crossing the entire thickness (see fig. 5).

With respect to claim 5, Kobayashi discloses that the semiconductor component is of multicellular type, and the junctions (j) are formed of several cylinders

Art Unit: 2814

perpendicular to the main substrate surfaces (see fig. 5).

Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 1-8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of co-pending application 10/763,070. Although the conflicting claims are not identical, they are not patentably distinct from each other because the co-pending application 10/763,070 merely broadens the claims of the present application.
